

Advanced Diploma of Information Technology (E-Learning)

Description

This qualification provides high level information and communications technology (ICT), process improvement and business skills and knowledge to enable an individual to be effective in senior ICT roles within organisations.

Job roles

Job roles and titles vary across different sectors. Possible job titles relevant to this qualification include: ICT projects manager, developer-cloud computing services/strategies for businesses, web programmer.

Employability Skills – Qualification Summary

The following table contains a summary of the employability skills for this qualification. The employability skills facets described here are broad industry requirements

<u>Employability skill</u>	<u>Industry/enterprise requirements for this qualification include:</u>
Communication	<ul style="list-style-type: none"> ▶ consulting, questioning, clarifying and evaluating information ▶ interpreting customer needs ▶ negotiating budgets and plans and then re-developing as required to meet organisational needs ▶ negotiating with internal and external stakeholders ▶ utilising excellent interpersonal skills, and producing a wide range of reports and making presentations as required
Teamwork	<ul style="list-style-type: none"> ▶ briefing various personnel on their roles and responsibilities regarding the implementation of the marketing plan ▶ coordinating resources and developing systems to manage team and individual performance ▶ defining performance measures and working collaboratively with team members ▶ identifying performance gaps and taking remedial action for underperformance
Problem-solving	<ul style="list-style-type: none"> ▶ assessing financial viability of new opportunities and matching organisational capability with market needs ▶ collecting and analysing data ▶ comparing and contrasting data ▶ conducting situational analyses

	<ul style="list-style-type: none"> ▶ developing and managing risk and contingency plans ▶ developing strategies for improvement ▶ performing cost benefit analyses, budgeting, assessing and managing risk
Initiative and enterprise	<ul style="list-style-type: none"> ▶ evaluating and improving market performance ▶ identifying strengths and opportunities within organisation's projected capabilities and resources
Planning and organising	<ul style="list-style-type: none"> ▶ collecting, collating and analysing information using appropriate workplace business systems ▶ developing customer acquisition and retention strategies ▶ developing systems that are flexible and responsive to changing circumstances ▶ evaluating processes and making changes as required ▶ planning and managing resource acquisition and deployment within budgetary constraints ▶ planning for contingencies
Self-management	<ul style="list-style-type: none"> ▶ applying discretion and judgement within complex environments ▶ managing own time and performance ▶ using judgement in planning and in the selection and allocation of resources ▶ working within organisational policies and procedures and legislative requirements
Learning	<ul style="list-style-type: none"> ▶ coaching and mentoring others to acquire new knowledge and skills ▶ providing learning and development opportunities
Technology	<ul style="list-style-type: none"> ▶ creating presentations using a range of media ▶ using computerised systems, software and telecommunication devices ▶ using technology to assist with the management of information and to assist the planning process ▶ using technology to record and generate ideas

Duration: 9 months + 6 months Industrial Attachment

Qualification Entry Requirements

Academic

- AAC Diploma of Information Technology OR
- Equivalent Diploma from any other PEIs in relevant field OR
- Obtained at least D for any GCE A-Level subject OR
- 12 years of formal education or equivalent

**Students who have completed Diploma of Information Technology will be granted exemption for 3 modules: DIT105 Web Programming; DIT114 Project Management; DIT115 Workplace Cyber Security from Diploma of Information Technology (ICT50220).

English Proficiency

- IELTS 5.5 OR
- AAC EFL Level 5 or equivalent.

Students without formal English qualifications will be given a placement test to determine their level of proficiency.

Minimum age: 17 years old

Qualification Modules

Part Time

#	Code	Module Name	Competency Code*	Competency Name*	Face to Face Contact Hours	Independent Learning Hours	Assessment Preparation Hours
1	DIT105	Web Programming	ICTWEB513	Build dynamic websites	30	55	40
			ICTWEB514	Create dynamic web pages			
2	DIT114	Project Management	ICTPMG613	Manage ICT project planning	30	55	40
			ICTPMG617	Plan and direct complex ICT projects			
3	DIT115	Workplace Cyber Security	BSBXCS402	Promote workplace cyber security awareness and best practices	30	55	40
4	ADIT202	Cloud Computing	ICTPRG614	Create cloud computing services	30	55	40
			ICTCLD601	Develop cloud computing strategies for businesses			
5	ADIT204	ICT Copyrights and Ethics	ICTICT618	Manage IP, ethics and privacy in ICT environments	30	55	40
6	ADIT206	Manage ICT Team	BSBTWK502	Manage team effectiveness	30	55	40
			ICTICT608	Interact with clients on a business level			
			BSBCRT611	Apply critical thinking for complex problem solving			
7	ADIT208	Advanced Programming	ICTPRG547	Apply advanced programming skills in another language.	30	55	40

8	ADIT209	ICT Strategic Business Plans	ICTSAD609	Plan and monitor business analysis activities in an ICT environment	30	55	40
			ICTICT611	Develop ICT strategic business plans			
9	ADIT210	Cyber Security Assessments	ICTCYS601	Create cyber security standards for organisations	30	55	40
			ICTCYS608	Perform cyber security risk assessments			
10	ADIT207	Industrial Attachment	-	-	-	970	-
					270	445	360
* Competency Code and Competency Name are taken from the 'ICT60220 - Advanced Diploma of Information Technology (Release 3)'. ** The Industrial Attachment (if any) is an integral module of the programme. However, suppose a student is unable to participate in the Industrial Attachment module due to circumstances beyond the control of the Student or the College, like non-approval of the Training Work Permit by the Ministry of Manpower or unable to secure an intern placement due to unavailability of vacancies, the Student will be required to complete a Research-Based Project with the submission of a report to be considered for graduation for the course. While AAC will make its best efforts to secure Industrial Attachment for the students, it does not guarantee that it will be able to secure one for every student.					Total 1125 learning hours (Excluding Industrial Attachment)		

Synopsis			
Module Name	Competency Code*	Competency Name*	Description
Web Programming	ICTWEB513	Build dynamic websites	This unit describes the skills and knowledge required to analyse and design websites to meet technical requirements.
	ICTWEB514	Create dynamic web pages	This unit describes the skills and knowledge required to analyse and design websites to meet technical requirements.
Project Management	ICTPMG613	Manage ICT project planning	This unit describes the skills and knowledge required to identify, plan, control and finalize complex information and communications technology (ICT) projects
	ICTPMG617	Plan and direct complex ICT projects	This unit describes the skills and knowledge required to implement quality assurance processes using quality control data to ensure continuous improvement for the benefit of current and future information and communications technology (ICT) projects
Workplace Cyber Security	BSBXCS402	Promote workplace cyber security awareness and best practices	This unit describes the skills and knowledge required to promote cyber security in a work area.
Cloud Computing	ICTPRG614	Create cloud computing services	This unit describes the skills and knowledge required to design, build, test and deploy web services and cloud computing applications to specifications.
	ICTCLD601	Develop cloud computing strategies for businesses	This unit describes the skills and knowledge required to develop a cloud computing strategy

			to establish cloud computing services to improve a business.
ICT Copyrights and Ethics	ICTICT618	Manage IP, ethics and privacy in ICT environments	This unit describes the skills and knowledge required to manage the issues of intellectual property (IP), copyright and professional and ethical conduct in a team and to ensure that personal information of stakeholders is handled in a confidential and professional manner.
Manage ICT Team	BSBTWK502	Manage team effectiveness	This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.
	ICTICT608	Interact with clients on a business level	This unit describes the skills and knowledge required to interact with clients at a management level.
	BSBCRT611	Apply critical thinking for complex problem solving	This unit describes the skills and knowledge required to apply critical thinking in order to develop solutions to complex issues arising in the workplace.
Advanced Programming	ICTPRG547	Apply advanced programming skills in another language.	This unit describes the skills and knowledge required to undertake advanced level programming tasks using another programming language. The language may be an object-oriented language
ICT Strategic Business Plans	ICTSAD609	Plan and monitor business analysis activities in an ICT environment	This unit describes the skills and knowledge required to establish and manage Information and Communications Technology (ICT) business analysis activities in a medium-to-large organisation.

	ICTICT611	Develop ICT strategic business plans	This unit describes the skills and knowledge required to create strategic in alignment with organisational Information and Communications Technology (ICT) goals and strategies.
Cyber Security Assessments	ICTCYS601	Create cyber security standards for organisations	This unit describes the skills and knowledge required to research, plan and implement cyber security standards for an organisation.
	ICTCYS608	Perform cyber security risk assessments	This unit describes the skills and knowledge required to conduct a risk assessment and analysis in a business environment. The risk assessment requires the identity and alignment of an organisation's operating environment to their required risk register and the realignment of their operations.
Industrial Attachment	ADIT207	Industrial Attachment	The industrial attachment allows the student to apply the concepts and principles gained in the Advanced Diploma of Information Technology. Students will undertake an internship programme with IT companies and companies with IT departments exposed to network servers, software, and hardware development, supporting IT infrastructure and system security, web programming, or any other areas in the IT sector related to their interest or area of specialisation.

Assessment Arrangements

Competency Code	Competency Name	Demonstration	Practical	Activities	Observation	Role play	Case study/Scenario	Questions and Answers	Project/Report	Presentation,	Portfolio/Journal	Online
ICTWEB513	Build dynamic websites		✓	✓			✓	✓	✓		✓	
ICTWEB514	Create dynamic web pages		✓	✓			✓	✓	✓		✓	
ICTPMG613	Manage ICT project planning	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓
ICTPMG617	Plan and direct complex ICT projects	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓
BSBXCS402	Promote workplace cyber security awareness and best practices			✓	✓	✓	✓	✓	✓			
ICTPRG614	Create cloud computing services	✓	✓	✓			✓	✓	✓	✓	✓	✓
ICTCLD601	Develop cloud computing strategies for businesses	✓	✓	✓			✓	✓	✓	✓	✓	✓
ICTICT618	Manage IP, ethics and privacy in ICT environments		✓				✓	✓	✓		✓	
BSBTWK502	Manage team effectiveness			✓		✓	✓	✓	✓	✓	✓	✓
ICTICT608	Interact with clients on a business level			✓	✓	✓	✓	✓	✓	✓	✓	
BSBCRT611	Apply critical thinking for complex problem solving			✓	✓	✓	✓	✓	✓	✓	✓	
ICTPRG547	Apply advanced programming skills in another language.		✓	✓			✓	✓	✓		✓	
ICTSAD609	Plan and monitor business analysis activities in an ICT environment			✓	✓	✓	✓	✓	✓			
ICTICT611	Develop ICT strategic business plans			✓	✓	✓	✓	✓	✓			
ICTCYS601	Create cyber security standards for organisations		✓	✓			✓	✓	✓			

ICTCYS608	Perform cyber security risk assessments		✓	✓			✓	✓	✓			
ADIT207	Industrial Attachment								✓			

The assessment objectives tested in these modules are broadly categorised in the following hierarchical order:

1. **Knowledge:** Exhibit memory of previously learned materials by recalling facts, terms, basic concepts and answers
2. **Comprehension:** Demonstrate understanding of facts and ideas by organizing, comparing, translating, interpreting, giving descriptions, and stating the main ideas
3. **Application:** Using new knowledge. Solve problems in new situations by applying acquired knowledge, facts, techniques and rules in a different way
4. **Analysis:** Examine and break information into parts by identifying motives or causes. Make inferences and find evidence to support generalizations
5. **Evaluation:** Present and defend opinions by making judgments about information, validity of ideas or quality of work based on a set of criteria
6. **Synthesis:** Compile information together in a different way by combining elements in a new pattern or proposing alternative solutions

Specification Grid

The relationship between the assessment objectives and components of the scheme of assessment is as follows

Knowledge	Comprehension	Application	Analysis	Evaluation	Synthesis
10%	20%	20%	20%	20%	10%

The assessment objectives are weighted to give an indication of their relative importance. They are not intended to provide a precise statement of the number of marks in particular skills.

Code	Name of the module	Assessment 1	Assessment 2
DIT105	Web Programming	50%	50%
DIT114	Project Management	50%	50%
DIT115	Workplace Cyber Security	50%	50%
ADIT202	Cloud Computing	50%	50%
ADIT204	ICT Copyrights and Ethics	50%	50%
ADIT206	Manage ICT Team	50%	50%
ADIT208	Advanced Programming	50%	50%
ADIT209	ICT Strategic Business Plans	50%	50%
ADIT210	Cyber Security Assessments	50%	50%
ADIT207	Industrial Attachment	100%	NA

Marks and Grades

The infographic below shows the academic grading of this course with the breakdown of marks.

Graduation Requirement:

In order to be awarded the Advanced Diploma of Information Technology (E-Learning), a student must obtain at least a Pass Grade in all the modules within the eligibility period of 2 years from the original completion date.

Certificate will be awarded by Academies Australasia College.
